**Welcome/Orientation**

For on-line classes *MyLab/Mastering* (MML) program will be used. You are required to purchase a MML access code which is your *e-book*. With the MML-access code you will be able to sign into the MML course that has been set up for your class. Quizzes and homework assignments can only be submitted in MML. Please see the syllabus for your class for more information regarding textual material.

You can purchase an e-book/ MML access code directly from the MML site. You can also purchase a print textbook plus MML access code bundle from the HCC’ Book Store.

To purchase your e-textbook on-line, first you need to get your course ID. The course ID will be announced in Blackboard under announcements. The course syllabus will also be available in Blackboard approximately one week before beginning of the class.

Please visit the MML web site at: [http://www.pearsonmylabandmastering.com/northamerica/](http://www.pearsonmylabandmastering.com/northamerica/) for more information regarding the program or purchasing your e-book on line.

For previewing MML sample problems, first get the textbook information from the syllabus and then visit [www.interactmath.com](http://www.interactmath.com).

There will be no orientation specifically for on-line and hybrid courses. On-line students can check out the distance learning home page if they need help with the technical aspects of on-line learning.

**Important:**

- Please be advised that the college’s help desk cannot help with the technical issues related to MML. For technical support related to MML, please call the MML support at 800-677-6337 or, click [HERE](http://www.pearsonmylabandmastering.com/northamerica/).
- Announcements will be posted in MML under Announcements. Try to log into the course regularly for important information such as changes in the deadlines.

Have a great semester and enjoy the course.

Best Regards,

*Prof. Fary Sami*
