Review for Exam 3
Chapter 8
1. List five strategies for keeping a relationship healthy.
2. Define dysfunctional relationships. Describe three types of enabling behaviors.
3. List and describe Sternberg's six types of love.
4. List three major issues that couples confront, and give strategies for dealing with those difficulties.
5. Briefly discuss three types of therapy used in marriage counseling.

Chapter 9
1. Know the male and female sex hormones and the role they play in puberty.
2. Describe the male and female reproductive systems.
3. Describe five of the eight different types of sexual activity.
4. Describe the four stages of Masters and Johnson’s sexual response.
5. Describe two different sexual dysfunctions (include cause and treatment).

Chapter 10
1. Identify five methods of birth control. Give advantages and disadvantages of each.
2. Define abortion. Describe three different methods used.

Chapter 16
1. Give an example of five different sexually transmitted diseases along with symptoms and possible side effects for each.
2. Discuss what you can do to decrease your chance of developing a sexually transmitted infection (STI) if you are in a sexual relationship with a partner.
3. Explain what it means when someone is said to be ‘asymptomatic’ in having a sexually transmitted infection (STI). How is it dangerous, particularly if this person is infected with Chlamydia and doesn’t know it?
4. Prevention of HIV infection can be easily accomplished by practicing safer sex with a sexual partner, such as using a male or female condom, or being faithfully monogamous to that partner. However, HIV infection rates continue to climb among young college-aged adults. Discuss why this is the case and what specific behavioral change needs to occur for the HIV infection rates to decline.
