**Oral Presentation**

Each student, with a partner or two, will be required to give a 10-12 minute talk/demonstration on a topic relating to wellness. The topic will be pre-approved by the instructor prior to administering the oral presentation. The topic should be relevant to a college aged audience. (Ie. Nutritional disorders among 18-25 year olds or the most prevalent STD’s among college students)

The media used during the presentation will be up to the students. Work on making it engaging for the class. Use power point, video, survey, quizzes, guest speakers, handouts, etc. You don’t have to use them all, but make it visually appealing. However, the guest speaker or video cannot be more than 5 minutes of your presentation.

Students must use a minimum of three sources/references while researching their topic. Use sources that are not dated. Keep the research current.

Prior to giving their presentation the students must submit an outline of their topic, including references/sources that may have been used during the preparation of their presentation. I repeat, use an outline format, **not a copy of your slides.** It should all fit on the front and back of one page. Don’t waste paper. One outline per group.

Once students are assigned a date, failure to comply (no show) with the date assigned, without proper notice, will result in a lower grade for your presentation.

- Presentation is within the specific time frame (10-12min)
- Submitted prior to the presentation; Follows the presentation in an organized manner
- Used at least three quality sources; MLA Format
- Demonstrated knowledge by not reading directly off the board; Refers to note cards or memory
- Engages the audience through visuals or other content (PowerPoint, poster, handouts, etc.)
