Ride #2 – Moderate Loop

Start at the pumping station. Ride up Craigs Corner Rd to the entrance for the campground. Go up the campground entrance road (1) and make a right onto the dirt road before the check-in cabin (2). Proceed up the hill and follow the field trail along the tree line to the entrance of the old barn trail. Turn onto the barn trail (3). When there is a choice, stay left until you reach the short wooden bridge at the end (4). Continue on that trail for about two tenths of a mile and make a right (5) that will take you out to Stafford Road across from the bridge (6). Follow Craigs Corner Rd to the left along Deer Creek back to the pumping station.
