Note 1: Top view shown

Note 2: Cross brace of plywood, 3/8" or 11/32" thick, attached with bottom edge 10" from bottom of leg. For placement of leg socket.

Note 3: Cut leg length to 32" for module using standard height risers above tabletop. Cut leg length to 37" for modules without risers.

Note 4: Bottom end of each leg to be drilled to accept 1/4" x 20 TPI T-nut, then have 1/4" x 20 TPI x 4" long eye bolt inserted for height adjustment.
